Requirements

Server requirements

- This add-on requires Latest version of **Karenderia Multiple Restaurant System**
- If you want to install on localhost use XAMPP
- Server minimum requirements
 - PHP version 7.2 + (karenderia is build and stable in 7.4.27)
 - Mysql 5.6+
 - Mod_rewrite Apache
 - JSON php extension
 - MBstring php extension
 - PDO PHP extension
 - Ziparchive extension
 - Fileinfo Extension
 - GD Library (>=2.0) OR Imagick PHP extension (>=6.5.7)

In most server, these extension are enabled by default, but you should check with your hosting provider.

How to activate your license

Steps are

- Open this link in your browser <http://bastisapp.com/activation/>
- In the respective fields, put your Name, E-mail, CodeCanyon Username, Purchase Key and your domain
- Click activate
- You can change the activation later from this same form. Activating a Regular license again with another domain name will remove the activation of the previous domain
- If your doing a test in your **localhost** no need to register
- If your ready to go live you need to update your domain registration
<http://bastisapp.com/activation/index.php/index/updatedomain>

Where can I find the purchase code

- Login into your envato market account
- Hover the mouse over your username at the top of the screen.
- Click 'Downloads' from the drop-down menu.
- Click 'License certificate & purchase code' (available as PDF or text file).

If you still cannot find it envato has a video and image preview where to get it

Go to this link <https://help.market.envato.com/hc/en-us/articles/202822600-Where-Is-My-Purchase-Code->

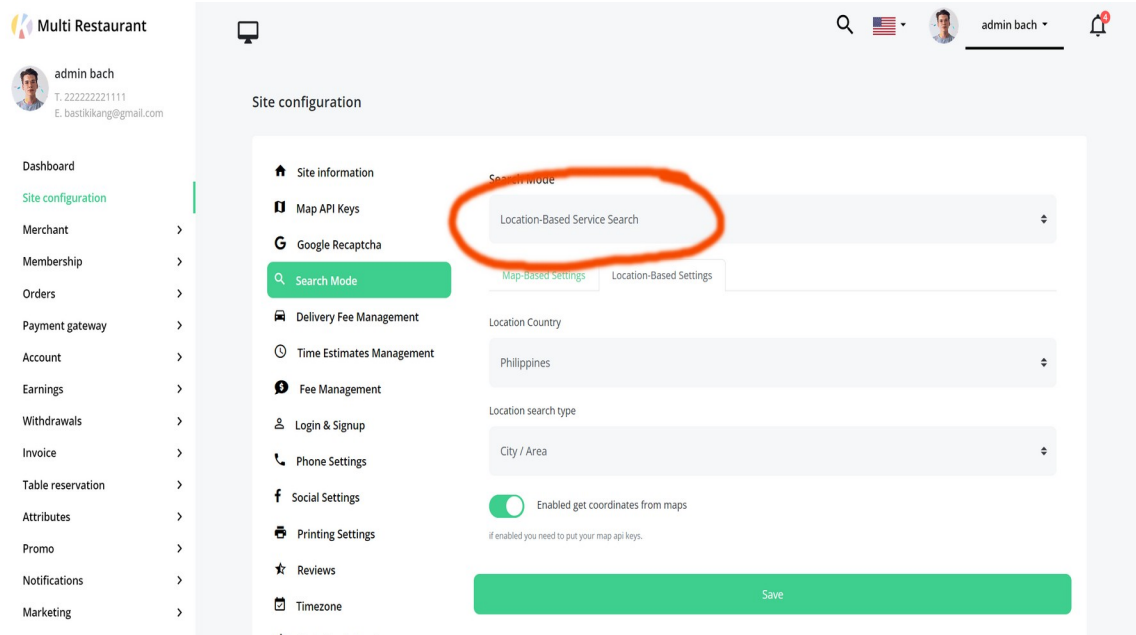

How to install addons

To install the addons follow this simple steps below.

- First Extract the zip file **Karenderia Location-Based Service Search Addon.zip**
 - To install addons login to your admin panel and navigate to **addon manager**
 - Click on **install/update addon**
 - Locate the **LocationBasedModules.zip** that you extracted
 - Click **install/update**
 - **Finish**
-

Enabled Location-Based Service Search

- To enable Location-Based Service Search Addon go to admin panel -> site configuration -> search mode -> search mode -> choose -> Location-Based Service Search

Define locations-based

- To defined locations just go to admin panel -> attributes -> manage location and choose country
Click on define locations

The image shows two screenshots of an admin panel interface. The top screenshot displays the 'Country List' page, and the bottom screenshot displays the 'State List' page.

Country List Screenshot:

- Left Sidebar:** Contains navigation links. 'Manage Location' is highlighted with a red arrow.
- Header:** Includes a search icon, a flag selector (USA), a user profile (admin bach), and a notification bell.
- Country List:** A table with columns 'Name' and 'Actions'. The table lists countries: Zimbabwe (ID 246), Zambia (ID 245), Yugoslavia (ID 244), and Yemen (ID 243). The 'Actions' column contains icons for edit, delete, and a copy icon (circled in red).
- Default Country:** A section showing '173 Philippines' with a copy icon (circled in red).

State List Screenshot:

- Left Sidebar:** Contains navigation links. 'Attributes' is expanded, and 'Manage Location' is highlighted.
- Header:** Includes a search icon, a flag selector (USA), a user profile (admin bach), and a notification bell.
- State List:** A table with columns '#', 'Name', 'Sequence', and 'Actions'. The table lists states: Camarines sur (ID 3, Sequence 0) and Laguna (ID 1, Sequence 0). The 'Actions' column contains icons for edit and delete.
- Navigation:** A breadcrumb trail shows 'All Country >> Philippines >> State List'. A sidebar on the left shows a list of location types: State List (selected), City List, and District/Area List.

Delivery Fee

- to set delivery fee for each location go to admin panel -> site config -> Delivery fee management

The screenshot shows the Multi Restaurant admin panel. The left sidebar contains a menu with options: Dashboard, Site configuration (highlighted), Merchant, Membership, Orders, Payment gateway, Account, Earnings, Withdrawals, Invoice, Table reservation, Attributes, Promo, Notifications, and Marketing. The main content area is titled 'Site configuration' and lists various settings: Site information, Map API Keys, Google Recaptcha, Search Mode, Delivery Fee Management (highlighted), Time Estimates Management, Fee Management, Login & Signup, Phone Settings, Social Settings, Printing Settings, Reviews, and Timezone. The 'Delivery Fee Management' section displays a table with columns: ID, Country, State, City, Area, Fee, and Actions. The table contains three entries:

ID	Country	State	City	Area	Fee	Actions
14	Philippines	Camarines sur	Naga City	Bagumbayan	3.00\$	
13	Philippines	Laguna	Cabuyao	Mamatid	2.00\$	
10	Philippines	Laguna	Cabuyao	Niugan	1.00\$	

Below the table, it says 'Showing 1 to 3 of 3 entries'. There are pagination controls: 'Previous', '1' (selected), and 'Next'. At the top right of the table, there is a search bar and buttons for 'Excel', 'CSV', and 'PDF'.

The screenshot shows the 'Add Rate' modal form overlaid on the 'Delivery Fee Management' section. The modal has the following fields:

- Country: Philippines (dropdown)
- State/Region: Please select (dropdown)
- City: Please select (dropdown)
- District/Area/neighborhood: Please select (dropdown)
- Delivery Fee: 0 (input field with up/down arrows)
- Minimum Order: 0 (input field with up/down arrows)
- Maximum Order: 0 (input field with up/down arrows)
- Min. Order for Free Delivery: 0 (input field with up/down arrows)

A 'Submit' button is located at the bottom right of the modal. The background shows the same 'Delivery Fee Management' table as in the previous screenshot.

Time Estimate

- to set delivery time estimation go to admin panel -> site configuration -> Time Estimates Management

The screenshot displays the 'Multi Restaurant' admin interface. On the left is a sidebar menu with options like Dashboard, Site configuration, Merchant, Membership, Orders, Payment gateway, Account, Earnings, Withdrawals, Invoice, Table reservation, Attributes, Promo, Notifications, and Marketing. The 'Site configuration' section is expanded, showing a list of settings including Site information, Map API Keys, Google Recaptcha, Search Mode, Delivery Fee Management, Time Estimates Management (highlighted), Fee Management, Login & Signup, Phone Settings, Social Settings, Printing Settings, Reviews, and Timezone. The main content area shows the 'Time Estimates Management' table with columns for ID, Services, Country, State, City, Area, Estimations, and Actions. The table contains 4 entries. A search bar and export buttons (Excel, CSV, PDF) are at the top right. A pagination bar at the bottom shows 'Previous 1 Next'.

ID	Services	Country	State	City	Area	Estimations	Actions
8	dinein	Philippines	Laguna	Cabuyao	Mamatid	2-5 mins	
7	pickup	Philippines	Laguna	Cabuyao	Mamatid	5-10 mins	
6	delivery	Philippines	Laguna	Cabuyao	Niugan	5-10 mins	
5	delivery	Philippines	Laguna	Cabuyao	Mamatid	10-20 mins	

The screenshot shows the 'Add Estimation' modal form overlaid on the admin panel. The form has a title 'Add Estimation' and a close button. It contains the following fields: 'Select Services' (a dropdown menu), 'Country' (a dropdown menu with 'Philippines' selected), 'State/Region' (a dropdown menu with 'Please select' selected), 'City' (a dropdown menu with 'Please select' selected), and 'District/Area/neighborhood' (a dropdown menu with 'Please select' selected). Below these are two input fields for 'Min. Estimation Time' and 'Max Estimation Time', both with a value of '0' and up/down arrows. A 'Submit' button is at the bottom right of the modal.

Set Merchant Locations

- In order to show the merchant in front end during search you need to define where merchant operates by setting the restaurant locations.
- Go to admin panel -> merchant -> list -> edit merchant and go to tab -> Location Management

The screenshot shows the 'Multi Restaurant' admin panel. On the left is a sidebar with navigation options: Dashboard, Site configuration, Merchant (selected), List, New signup, Sponsored, Membership, Orders, Payment gateway, Account, Earnings, Withdrawals, Invoice, Table reservation, and Attributes. The main content area is titled 'All Merchant >> Edit Merchant >> McDonald's'. It features a merchant profile card with a logo and a list of locations. The 'Location Management' tab is active, displaying a table with 2 entries. The table has columns for ID, Country, State, City, Area, and Actions. The first entry (ID 12) is for Philippines, Laguna, Cabuyao, Mamatid. The second entry (ID 11) is for Philippines, Laguna, Cabuyao, Niugan. There are 'Add New', 'Excel', 'CSV', 'PDF', 'Previous', and 'Next' buttons. A search bar is also present.

ID	Country	State	City	Area	Actions
12	Philippines	Laguna	Cabuyao	Mamatid	
11	Philippines	Laguna	Cabuyao	Niugan	

This screenshot shows the same admin panel as above, but with the 'Add Location' modal open. The modal has four dropdown menus: Country (set to Philippines), State/Region (Please select), City (Please select), and District/Area/neighborhood (Please select). A 'Submit' button is at the bottom right of the modal. The background content is dimmed.

How to download the latest version

- Login to your Codecanyon account.
- Hover over your username from the top right corner and click 'Downloads' from the drop-down menu
- The downloads section displays a list of all the items purchased using your account Click the 'Download' button next to the item and select 'Main File(s)' which contains all
- The downloads section displays a list of all the items purchased using your account Click the 'Download' button next to the item and select 'Main File(s)' which contains all files, or 'Licence Certificate and Purchase Code' for the item licence information only.

How to upgrade to the latest version

To update to latest version process is still the same as installation

You need to upload the **LocationBasedModules.zip** under **admin panel -> addon manager**

Change logs

- 1.0 .0 (23 September 24)
 - o Initial release

Source and Credits

I've used the following images, icons or other files as listed.

- Yii framework

Finally

Once again, thank you so much for purchasing this application. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on codecanyon, you might consider visiting the forums and asking your question in the "Item Discussion" section.
